SUNRAY MEDITATIONSGESELLSCHAFT

Ven. Dhyani Ywahoo, spirituelle Leiterin

WELCOME

Are our feelings and our mind just biochemical processes?
Is matter all that exists?
Probably you also feel this notion, that this is an unfinished puzzle being presented to you.

You are cordially invited along with Venerable Dhyani Ywahoo to train your mind, your heart and your body.
In this seminar, we will listen to talks and practice meditations in which science and spiritual teachings will be combined with our own experiences. It also includes spiritual singing, rhythm, dance and physical exercises.

THOUGHTS OF SEPARATION ARE ILLUSORY

We are in a time of incredible opportunity as increased energy flows make apparent what illusions have been anchors of a false reality and sweet winds and waters are dispersing the patterns of ignorance that we may see more clearly reflected in our experience, the clarity of the open sky. Distractions created by the maras of separation intentionally obscure the common intelligence to support life, to protect the land and care for each other.

Understand that in this realm of duality, the mother wisdom and father skill to build begins in our hearts, our bellies and most importantly, through our eyes.

Let us see pathways of co-operation and observe the scientific documentation of the interrelationship of consciousness and matter. The concept and the making of enemy and the belief that it is all right to harm another because of a different view, culture or religion, is the utmost manipulation of the maras of ignorance, which feed upon confusion. Let each one choose through clear vision, clear speech, the co-operative activities that sustain family, clan, land, all beings.

Understand that how we view the world in a sense solidifies the wave into the appearance of what is seen. So be mindful of the heart's direct experience. Let us be compassionate, caring, and honest with ourselves and one another because our speech becomes the forms that arise. When we view a human as „other,“ then we fix them and ourselves in a particular state. Perceive the wave and the field of potential and understand how our speech and vision give rise to the experience of joy and suffering.

Time for us all to energize the joy markers.

Sincerely,
Venerable Dhyani Ywahoo

VENERABLE DHYANI YWAHOO
